

# Information COVID -19 (31)

To the entire IST community,

Following the monitoring that Instituto Superior Técnico has done of the evolution of the COVID19 pandemic and considering the change from a state of emergency to a state of calamity, the Board has decided that, as of next Monday, May 3rd 2021, the temperature control at the IST campuses' entrance will no longer be performed. On the other hand, the active surveillance of the campuses, promoting more frequent inspections of buildings, spaces and rooms, in order to check their capacity and ventilation conditions, as well as other aspects that may contribute to reduce the risk of contagion, will be reinforced. The rapid testing program will continue at least until the end of May, to ensure that all members of the community have access to it when we return to face-to-face activities.

I would like to take this opportunity to thank everyone for the conscientious manner in which the community has approached this disconnection, and to appeal to you to maintain behaviors that minimize the risk of contagion.

Stay protected, stay healthy!

Rogério Colaço  
President of IST
