

Information COVID -19 (32)

To the entire IST community,

Next Monday, May 10th, Técnico will enter the yellow phase of its prevention and contingency phases plan, which can be consulted here: https://tecnico.ulisboa.pt/files/2021/05/plano-de-preven-o-e-atua-o-covid_19-v6-anexo-i-matriz-de-fases-de-preven-o-e-conting-ncia.pdf.

In this yellow phase, the rules of physical distance and hygiene and disinfection naturally remain. But there will be a gradual opening of most campus spaces and services to the public. Laboratory classes must be face-to-face and practical classes also may be by booking rooms with the pedagogical organization services of Alameda and Taguspark.

This is the last prevention and contingency phase before the green phase. This has been a complex and very demanding path for the whole IST community, which I am convinced is nearing its end. To all the members of this community, students, professors, researchers, technicians and administrative staff, I thank the resilient and tenacious way in which we have traveled this path.

Stay protected, stay healthy!

Rogério Colaço
President of IST
